Experience

Accenture

Feb. 2024 – Present

Associate Software Engineer

Kolkata, India

- Developed ETL pipelines using Databricks platform and Talend to efficiently process, transform, and analyze large volumes of data.
- Developed data transformation scripts using Python, SQL, and Talend to streamline data processing workflows, resulting in a significant increase in the speed of data extraction, transformation, and loading processes.
- Automated data processing tasks using Databricks Jobs and Talend scheduling features, ensuring timely delivery of insights to stakeholders.
- Collaborated with cross-functional teams to design and implement optimized data models and schemas on Databricks clusters and Delta Lake architecture, leveraging Delta Tables and Live Tables for efficient data management, versioning, and streamlining workflows.

LTIMindtree

May 2023 – Sept. 2023

Apprentice

Remote

- Gained expertise in a range of technologies, including TypeScript, AngularJS, Java Database Connectivity (JDBC), GitHub, Core Java, JavaScript, and SQL.
- Applied version control practices using GitHub during the apprenticeship, ensuring efficient collaboration and code management throughout the software development process.

EPAM Systems.

Sept. 2020 – June 2021

Apprentice

Remote

- Engaged in a comprehensive pre-education program and apprenticeship at EPAM Systems.
- Acquired proficiency in essential software development tools and technologies, including Gitlab for version control, Core Java for application development, Maven for project management, and front-end technologies such as HTML5, JavaScript, and CSS for web development.

Education

Asansol Engineering College

Sept. 2019 – July 2022

Bachelor of Technology in CSE (CGPA - 8.9)

Asansol, West Bengal

Dr. B. C. Roy Polytechnic

July 2016 – June 2019

Diploma in CST (CGPA - 8.0)

Durgapur, West Bengal

Projects

Online Job Portal (EJOB) | HTML, CSS, JavaScript, PHP

- Created a job posting website where recruiters can post job opportunities and job seekers can apply.
- Utilized HTML, CSS, JavaScript, and PHP to create interactive web pages for job postings and applications.

OpenCV Projects

- **Text Extractor:** Built a Python OpenCV project to extract text from any image.
- **Face Detection:** Implemented real-time face detection using OpenCV to detect multiple faces from webcam feeds.
- **Smile Detection:** Created a smile detector using OpenCV to determine if a person is smiling or not.

Technical Skills

Programming Languages: C, Java, Python, SQL

Web Development: HTML, CSS, JavaScript, Django, jQuery, Bootstrap, Node.js, Express.js, Angular.js, TypeScript

Libraries/Frameworks: OpenCV, NumPy, Pandas, Matplotlib, Scipy, Seaborn

Version Control: Git, GitLab, GitHub, Git Bash

Databases/Tools: MySQL Workbench, MongoDB, phpMyAdmin, VSCode, PyCharm, Eclipse, PowerBI

Big Data: PySpark, Databricks

Data Engineering: Talend

Leadership / Extracurricular

- Solved over 300+ Coding Questions on different coding Websites
- Engaged in Hackathons, and open source programs and solved real-time problems
